

9/11:

Blueprint for Truth

The Architecture of Destruction

with Architect Richard Gage, AIA

Sunday, Oct 14, 2007

6:30 PM to 9:30 PM

Joyce Beers Center

Hillcrest/Uptown Shopping Center

San Diego, CA

Did you know that:

- 118 first responders witnessed explosions and flashes?
- Tons of molten iron was “flowing like lava” under the buildings?
- Thermite, an incendiary used to cut steel, was found in the WTC beams and in the WTC dust?
- **3** buildings were destroyed on 9/11, including Building 7, a 47-story skyscraper that fell at nearly free fall speed into its own footprint?

Richard Gage, AIA, is a 20-year architect who has performed extensive research into the collapses of all 3 World Trade Center buildings. What he has to present in a live multi-media presentation is shocking and timely. Come see for yourself, ask questions and ***demand answers!***

WTC Building 7
