Creating A New Path To Peace and Prosperity

Sen. Mike Gravel and Lt. Col. Bob Bowman on Empowering Citizens to End the 9/11 Wars and Restore Lost Liberties

Richard Gage, AIA, is well known to many in the Bay Area. He is the dynamic founder of Architects and Engineers for 9/11 Truth, which has grown to 1500 petition signing professionals. He will update us on the many recent activities of AE911Truth.

Introducing Kathy McGrade, a Silicon Valley engineer now affiliated with AE911Truth. Her work includes ensuring the safety of firefighters during structural fires. She presents a sharp critique of the government’s account for the demise of the three WTC Towers.

Featured Speakers

As part of his long and distinguished career, Bob Bowman ran for President in 2000 and for the US Congress in 2006. Bob Scheer of the LA Times called him “probably the best public speaker in the country today.” Dr. Bowman will give new voice to several of his recurrent themes—no more imperial presidency, no more undeclared corporate wars, no more spying on the American people, no more repression of dissidents, no more exporting of jobs, no more government lies, false-flag attacks, and cover-ups.

Two term Senator from Alaska Mike Gravel first gained national attention when he read the Pentagon Papers into the Congressional Record. For the last two decades, he has worked to establish a National Initiative process to empower citizens. Mike ran for president in 2008, and more recently is leading efforts for a series of state initiatives calling for a new, independent investigation of 9/11.
