WTC 1 & 2
The Twin Towers

EXPLOSIVE Evidence

✓ Near free-fall acceleration through what was the path of greatest resistance

✓ Multi-ton steel sections ejected laterally 600 feet at 50 mph

✓ 1,400 foot dia. debris field: “Pancaked” floors missing at bottom

✓ Mid-air pulverization of 180,000 tons of concrete and metal decking

✓ Isolated explosive ejections 20-60 stories below “collapsing building”

✓ Over one hundred first responders reported explosions & flashes of light

✓ Several tons of molten iron/steel found under all 3 high-rises
