**For Immediate Release**

## **1,500 Architects & Engineers Disprove Official 9/11 Account of WTC Destruction**

Richard Gage, AIA, 23 year San Francisco Bay Area architect and member of the American Institute of Architects will be speaking at The Royal Institute of British Architects on Monday June 20, 2011 about the near free-fall destruction of the three World Trade Center skyscrapers on 9/11. He employs scientific and forensic principles to demonstrate that the high-rises could not have collapsed on September 11, by plane impacts and jet fuel alone.

He will explain how the official FEMA and NIST (National Institute of Standards and Technologies) reports provide incomplete and contradictory accounts of the towers' destruction. Attention will be given to mysterious free-fall symmetrical destruction of World Trade Center 7, a 47-story building which was not hit by an aircraft, yet also collapsed that afternoon<sup>(1)</sup> Never before, or since, has fire caused the destruction of a skyscraper.

Neither have fires in buildings ever melted solid steel girders causing a "swiss cheese" appearance – shocking Materials Science Professors like R.R.Biederman and R.D.Sisson jr, who expected to see "distortion and bending but not holes".<sup>(1)</sup>

The New York Times called these findings "the deepest mystery uncovered in the investigation .... the steel apparently melted away, but no fire in any of the buildings was believed to be hot enough to melt steel outright."<sup>(3)</sup>

Mr. Gage, founded Architects & Engineers for 9/11 Truth (AE911Truth) in 2006. The organization now has more than 1,500 engineers and architects signed onto the petition. They, along with military officers, pilots, fire fighters, 9/11 survivors and families, support an independent reinvestigation into the events of 9/11.

As the 10th anniversary of 9/11 approaches, criticisms of the official story abound – not the least of which is the 9/11 commissioners themselves.<sup>(4)</sup>

Gage will be speaking at The Royal Institute of British Architects, 66 Portland Place, London W1, (tubes Grt PortlandSt / Regents Pk) on Monday 20 June 7pm.
