UC Boulder Debate: World Trade Center Destruction - 9/11 Natural Collapse or Controlled Demolition?

5:00 pm Sunday, March 6, 2011

University of Colorado - Boulder
University Memorial Center, room 235
1669 Euclid Ave.
Boulder, CO

BOULDER—The intense and controversial debate is set between the proponents of the “natural collapse” theory and the “controlled demolition” theory. Internationally acclaimed 9/11 speaker and architect Richard Gage, AIA, will present the evidence of the *explosive* destruction of the *three* World Trade Center skyscrapers on 9/11. The event will be held in Boulder at University of Colorado on Sunday, March 6 at 5:00 p.m. Gage will be representing more than 1,400 architects and engineers who question the official story of the collapse of these buildings on 9/11/2001 and are calling for a new independent investigation into the catastrophic events. Rev. Chris Mohr, an independent journalist and advocate of the “natural collapse” theory, will present evidence supporting the official account of collapse by fire.

Gage, a 23-year architect is a member of the American Institute for Architects and founder of Architects & Engineers for 9/11 Truth (AE911Truth). The organization cites evidence that the official FEMA and NIST (National Institute of Standards and Technology) reports provide incomplete and contradictory accounts of the towers’ destruction. AE911Truth points in particular to the destruction of the *third* skyscraper, World Trade Center 7, a 47-story building which was *not* hit by an aircraft, yet came down in pure free-fall acceleration for at least 100 feet—per NIST, and in the exact manner of a classic controlled demolition. The implications are startling. The group bases its conclusions solely on forensic evidence and does not speculate as to who may have planted the explosives.

AE911Truth’s conclusions are shared by thousands of scientists; senior-level military, intelligence and government officials; pilots and aviation professionals; firefighters; scholars and university professors; 9/11 survivors and their family members; and other professionals around the world (www.patriotsquestion911.com, www.firefightersfor911truth.org, www.journalof911studies.com).
