Saturday, December 5, 2009 at 2:00 p.m.
Tokyo
Venue: Zendentsu Hall
Local contact: Yumi Kikuchi yumik@fine.ocn.ne.jp

See bottom of page for remainder of tour cities.

YOKOHAMA—Internationally acclaimed 9/11 speaker and architect Richard Gage, AIA will present the evidence of the destruction of the three World Trade Center skyscrapers on 9/11 at Kindai Bungakukan on Friday, December 4 at 6:30 p.m. as the first of seven presentations throughout Japan. Gage will give a live dynamic multimedia presentation on behalf of more than 950 architects and engineers questioning the official story of what happened to these buildings on 9/11/2001. After careful examination of the forensic data omitted from the official account, these professionals are calling for a new independent investigation into these catastrophic events.

A practicing architect for more than 20 years, Richard Gage, AIA is the founder of Architects & Engineers for 9/11 Truth (AE911Truth). The organization provides evidence as to how the official FEMA and NIST reports provide incomplete and contradictory accounts of the towers’ destruction. AE911Truth points in particular to the destruction of the third skyscraper, World Trade Center 7, a 47-story building which was not hit by an aircraft, yet came down at free-fall acceleration for more than 100 feet—per NIST. The implications are startling. The group bases its conclusions solely on forensic evidence, avoiding conspiracy theories altogether.
Mr. Gage’s trip will be highlighted by a meeting with the famous Senator Yukihsa Fujita who is spearheading the monumental Japanese effort for 9/11 Truth.

AE911Truth’s conclusions are shared by thousands of scientists; senior-level military, intelligence and government officials; pilots and aviation professionals; firefighters; scholars and university professors; 9/11 survivors and their family members; and other professionals around the world (www.patriotsquestion911.com, www.firefightersfor911truth.org, www.journalof911studies.com).

The 9/11 Truth Movement, which *Time* magazine in 2006 called “a mainstream political reality,” continues to gain momentum. As AE911Truth’s own influence grows, Gage has embarked on more than 100 speaking events, covering 20 states and now 13 countries. The organization recently hosted exhibits at architectural conventions in San Francisco, Washington, DC and Richmond, VA, educating hundreds of architects and engineers, signing up over 100 of those architects and engineers onto the petition calling for a new investigation.
